Bosch IR Interpretation System

Ultimate comfort in language distribution

BOSCH Integrus is the ideal system for use in conference centers and for international organizations, or whenever simultaneous interpretation is required.

The Integrus fully digital infrared language distribution system has been specifically designed for multilingual conferences and meetings to enable delegates to understand what is being said. Simultaneous interpretation of presentations and speeches in the delegate's own language is transmitted to a pocket receiver and headphones. Because it is an infrared system, conference or meeting participants can move freely around the location whilst still able to follow proceedings.

The system is highly flexible and offers exceptional audio quality, making it ideal for conference centers and international organizations, no matter what the size of the event or venue. As a result, it has become the infra-red language distribution system of choice for event organizers.

TECHNICAL SPECIFICATIONS:

- ▶ Advanced digital technology for a superior listening experience
- ▶ Secure infra-red distribution
- ▶ No interference from lighting
- ▶ User-friendly selection of up to 32 channels
- ▶ Attractive, ergonomic receiver design
- ▶ Seamless integration with Bosch's DCN Conference systems

Sound-Proof Simultaneous Interpretation Booth

Each panel is built with wood nish laminate exterior with special isolated sound proof berglass panel. Material is re retardant UL-723. Inside covering is made with decorative textile 100% polyester. Cotton of 9 mm. Woven density and weight of 60 gr. per meter. Framing is PVC extrusion with unique connecting concept with industrial Velcro for easy assembly without tools.

Easy to install working table, double Plexiglas® windows, air conditioning, soundproof flooring, interior partition systems, custom size built.

Translation India's interpretation booths have served at some of the most prestigious meetings and conferences throughout the world.

Designed to create the best acoustic environment for the distinction of various languages spoken simultaneously, Whisper Cube provides the perfect visual and two-way audio communication between the interpreters and the participants in various meetings conferences.

Sennheiser Tour-Guide Systems

Created to inspire people.

Sennheiser has been at home in the world of sound for more than 60 years. With this know-how and experience we develop firstclass, reliable audio solutions for a wide range of uses.

Factory tour. You wish to take several visitor groups through your production facility simultaneously? The machines work fast – and produce not only unique products, but also intensive background noise. The tour guide should be able to talk calmly at a normal level – and visitors should be able to understand every single word during the entire tour. A powerful system with excellent speech intelligibility is called for here.

Whether it is a quiet or noisy environment, a small or large group, several different groups or just one, with or without an interpreter, with or without a tour guide, audio in combination with visual applications ... Translation India is the right partner for reliable transmission of information.

FEATURES:

- ▶ 6 channels in the license-free frequency range.
- ▶ Microphone input with adjustable sensitivity
- ▶ Line input with adjustable sensitivity
- ▶ Backlit display shows:
 - ▶ channel selection
 - ▶ battery status
 - ▶ audio level meter for microphone
 - ▶ lock mode
- ▶ Yellow LED: peak warning
- ▶ Red LED: MUTE or LOW BATT warnin

Audience Response System (Voting Pads)

All you need to set up with XPRESS is a computer equipped with PowerPoint software; and the plug and play capability allows you to bring the system wherever you go. Not only can questions be efficiently converted or created, it also supports auto marking and instant reports generation. Hence, with the functions of real-time result and automatic graphical report generation, XPRESS is definitely your ideal system for training, performance assessment and statistical analysis during lectures, conference, presentations, and more.

FEATURES:

- ▶ Single selection
- ▶ Numeric selection
- ▶ Multiple selections
- ▶ Buzz-in
- ▶ True/False
- ▶ Rating scale

USED IN:

- ▶ Quiz & Test
- ▶ Buzz-In
- ▶ Student Examination
- ▶ Voting & Survey
- ▶ Corporate Training
- ▶ Marketing Events

RFID Card - Access control for events and Conferences

Maximize safety, security and convenience for customers, guests and employees and heighten efficiency in your people identification and management applications with our next-generation ultra-high-frequency (UHF) radio frequency identification (RFID) card. It's the world's first passive RFID card to provide a read range of up to 50 feet.

Because this RFID card can be read from afar even through badge holders, handbags, pockets and backpacks, you can use it to streamline and ease congestion in your identification, access control and transaction processes. Plus, keep track of people to increase personal safety and facility security, capture guest/visitor data.

EXHIBIT ENTRANCE

IDEAL FOR THESE APPLICATIONS

1. Long-range identification
2. Access control
3. Event management
4. Social media experience
5. Asset tracking

BOSCH Discussion Solutions

- Low susceptibility to mobile phone interference
- Compact, attractive and ergonomic design
- Pluggable microphone
- Built-in loudspeaker
- Usable as dual delegate unit & chairman

The BOSCH Discussion Unit enables participants to speak, register a request-to-speak and listen to the speaker. A socket is provided to connect the pluggable microphones.

The unit also accommodates two separate headphone connections with individual volume control on either side of the unit, allowing one unit to serve two delegates. It can be converted to a full dual-use unit by replacing the microphone button with two separated microphone buttons for individual microphone control and individual delegate identification

Functions:

- Headphone output level reduction to prevent acoustic feedback (active when listening to the floor and when the microphone is on). When unit is used in Dual Delegate mode, this function is available individually
- Built-in loudspeaker speaker is muted when the microphone is on to prevent acoustic feedback
- Unit can be used as a single delegate unit, as a dual delegate unit, as a chairman unit (DCN-DISBCM chairman buttons, to be ordered separately) or as a single delegate unit with auxiliary button
- The versatile auxiliary button can be used as an usher call, for example
- To lock the loop-through cable, a cable clamp is available (DCN-DISCLM, to be ordered separately)
